

1.(currently amended)      A method for reducing contamination inside a plastic container, comprising coating selected portions of the container with a coating that consists essentially of titanium dioxide such that the titanium dioxide is not substantially prevented from attracting atmospheric water molecules for loosening particle contamination, for facilitating cleaning the container to prevent contamination of the article when the article is stored in the container, and using the container for holding at least one semiconductor wafer.

2.      (Cancelled)

3.(original)      The method of claim 1, further comprising selecting the plastic material so that the plastic material includes polypropylene.

4.(original)      The method of claim 1, further comprising selecting the plastic material so that the plastic material includes polycarbonate.

5.      (Cancelled)

6.      (Cancelled)

7.      (Cancelled)

8.      (Cancelled)

9.      (Cancelled)

10.(currently amended)      An apparatus for reducing contamination of an article, comprising a plastic container adapted for holding the article, and a coating on selected portions of said container, said coating consisting essentially of titanium dioxide such that the titanium dioxide is not substantially prevented from attracting atmospheric water molecules for loosening particle

contamination, for facilitating cleaning the container to prevent contamination of the article when the article is stored in the container, the apparatus further comprising at least one semiconductor wafer disposed in the container.

11.(original) The apparatus of claim 10, wherein said container includes a closeable lid for substantially sealing the interior of the container from the external atmosphere.

12.(original) The apparatus of claim 11, wherein said container includes polypropylene.

13.(original) The apparatus of claim 11, wherein said container includes polycarbonate.

14.(previously presented) The method of claim 2, further comprising selecting said portions to be interior surfaces of the container.

15. (Cancelled)

16. (Cancelled)

17. (Cancelled)

18. (Cancelled)

19. (Cancelled)

20. (Cancelled)

21.(currently amended) The method of claim [20] 1, further comprising providing said coating in the form of a gel

22. (Cancelled)

23. (Cancelled)

24. (Cancelled)

25. (Cancelled).
